# Digital product:
Reporting of Work Zone

Data generated from our digitals units are compiled in recurring reports for safety- and sustainable measurements and follow-up.

Extracted data to be compiled in reports on recurring basis, weekly and end-reports with following data-points:

Safety
- Average speed through work zone
- Battery status at each given time
- Incidents triggered

Sustainability
- Lowered CO_2 emissions
- Worksite personnel environment

Benefits

Running Project – Potential to identify and evaluate risks at worksites; upsell opportunity through adjusting worksite setup; value-added service for the customer (and feedback to regulator).

Future projects – leverage data to evaluate past projects with improved going-in knowledge for new projects.
