

Digital product: Traffic Radar

Monitor traffic flow and speed through worksite with high accuracy.

Overview

The **Radar** is flexible to measure detailed speed, vehicle type and traffic flow.

- Flexible mounting
- Position
- Accurate measurements

The Radar is used when **detailed traffic information** is requested/required.

The collected information is post-processed, analyzed and presented in **report format**.

Benefits

Increased safety

...high resolution traffic speed measurements to reduce risk of incident

Better service

...easily deployable and generating accurate real-time reports

Lowered cost

...affordable and mobile solution, adaptable use for specific traffic work circumstances

Improved sustainability

...traffic monitoring to recommend equipment for reduced traffic flow and speeds through reports
